

Installation of a REWATEC Flat Tank System at a large Water Company sewage treatment works

Problem no mains water supply for washing down equipment/pumps, etc.
Solution REWATEC high quality Rainwater Harvesting Flat Tank System

REWATEC Rainwater Harvesting Systems making a difference to the Environment

Downpipe filters fitted
Flat Tank Excavation - approx. 1 m deep

Simple rectangular hole
Minimum excavation - approx 3m³

Backfill material to form a firm base
No Concrete needed

Tank easily carried and fitted into excavation

Pump (self priming) fitted with water connection
Inflow/overflow and service ducts connected

Backfill material surrounding tank completes installation

First Water (UK) Limited trading as Rewatec UK

16 Worminghall Road, Oakley, BUCKS HP18 9QY, England

Tel 01844 238111 Fax: 01844 238703 email: enquiries@rewatec.co.uk Web: www.rewatec.co.uk

The flat tank is covered with top soil and has A lockable child proof cover

Using Rainwater to wash down the equipment

High pressure hose used with rainwater

Internal electric connection with PIR security system to prevent mis-use of the system

Transparent site now with a water supply for washing down equipment/pumps & servicing internal toilet

All installed and working in a 24 hour period supplying approx. 15,000 litres per year at this site.

**Installation & Commissioning carried out by REWATEC Partner Company
